

# How to Make a Toad Home

1 Get an old clay pot. The opening at the top of the pot should be about 20 cm wide.

2 Make a door by very carefully knocking a small section out of the top of the pot. The part you knock out should be in the shape of a half-circle. It should be about 8 cm wide and 4 cm down from the edge of the pot.

3 Find a shady spot in your backyard. Make sure there is water nearby. Put the pot upside down in the shady spot. Make sure there is water nearby. If there isn't -- go on to steps 4 and 5.

4 Get a small plastic bucket. Dig a hole in the ground that the bucket will fit into.

Make sure the top of the bucket is even with the ground.

Be sure to ask an adult for some help before digging any holes.

5 Put some rocks or bricks in the bucket so that they are about 5 cm away from the top of the bucket. Fill the bucket with water. Make sure you put new water in the bucket every few days.
