ABSTRACT

A mail survey was conducted following the 2020-2021 season to quantify trapper harvest and effort for furbearer species. Surveys were mailed to 1,500 randomly selected trappers who held annual or multi-year trapping licenses valid during the 2020-2021 season ($N=1,954$). Of the 1,500 surveys mailed, 395 (26.3%) were returned and all contained some usable data. Of the trappers who responded, 207(52.4%) reported that they trapped during the 2020-2021 season (active trappers) and 188 (47.6%) reported that they did not trap (non-active trappers).

On average, active trappers set 12.1 ($SE \pm 0.6$) traps for 33.9 ($SE \pm 1.6$) days during the 2020-2021 season. Response data was used to estimate trapping experiences of non-respondents and calculate total harvest, number of trappers, trapping effort, and catch per unit effort for each furbearer species statewide and by region. Trappers harvested an estimated statewide total of $32,753 \pm 4,541$ furbearers. Raccoons and muskrat were the most-harvested species with estimated totals of $7,925 \pm 992$ and $6,886 \pm 3,268$, respectfully. Observations of fishers and spotted skunks were also reported by trappers, but no least weasels were reported.

GOAL & OBJECTIVE

To quantify 2020-2021 statewide trapper effort and furbearer harvest and obtain additional occurrence information for rare furbearer species (i.e., fisher, spotted skunk, and least weasel).

METHODS

A total of 1,954 persons purchased annual or multi-year Virginia trapping licenses valid during some portion of the 2020-2021 trapping season (Table 1a). From that total, a random sample of 1,500 persons with valid addresses was selected using information from the Virginia Department of Wildlife Resources license database and a web-based tool to remove undeliverable addresses. The sample represented 76.8% of all license holders who held a valid license for some portion the 2020-2021 season. On 6 August 2021, each trapper was mailed a one-page (front and back) questionnaire (Appendix A), cover letter (Appendix B), and a postage-paid return envelope. Trappers were also provided with an option to complete the survey online. A reminder postcard (Appendix C) was sent to non-respondents on 17 September 2021 ($N=1,255$). A third and final mailing identical to the first was sent around 5

November 2010 to survey recipients who did not respond to the previous two mailings (N=1,196). No surveys were reported as undeliverable so the effective sampling total was 1,500. Trapping season date information is provided in Appendix D. Survey response data (i.e., harvest and effort data) were entered into an Access database where they were checked for quality and cleaned prior to statistical analyses.

Data Analysis — Descriptive and inferential statistical analyses were conducted in Microsoft Excel or RStudio (R Core Team 2018) with the assistance of R library packages “dplyr” (Wickham et al. 2018) and “survey” (Lumley 2017). Raw harvest data (county, species, number harvested, days trapped, number traps) were imported from the database, and used to create and append additional variables to the matrix, including trap region (Appendix E), number of trap days, whether the data record represented target or non-target efforts and if trap efforts were successful. Successful harvest data were considered non-target harvest, or “bycatch”, if the respondent reported take but zero trap days (either 0 days trapped or 0 traps set), or if the species was marked as “non-target” in the response.

We attempted to utilize all data provided whenever possible. For example, respondents may provide information about their harvest but neglect to identify the county in which the catch occurred. That information was retained when analyzing state-level metrics but was omitted from regional values; therefore, the number of respondents included for each level of analysis may differ. This results in differences in calculated metrics that are presented in data tables.

Input data for inferential statistical analyses conducted with R package “survey” were prepared by summarizing (subset) harvest data by individual trappers (rows) and species (columns) for the parameter of interest. Using these new input matrices, statewide and regional statistics (Tables 9–12) were estimated using the “svydesign()” function in R which allows for the incorporation of a finite population correction factor (FPC). Standard errors (SE) are presented to provide a measure of precision around estimated parameters (e.g., *estimated* total number of furbearer species harvested) and were calculated by dividing the standard deviation (SD) by the square root of the appropriate sample size.

As is recommended when sampling is conducted without replacement from more than 5% of a finite population, a finite population correction factor (FPC) was used to calculate SE (i.e., more than 5% of the population of 2020-2021 trappers were sampled; 395 samples; finite population = 1,954 trapping licenses) (Lumley 2010; Thompson 2012).

RESULTS SUMMARY

A total of 395 (26.3% effective response rate) license holders responded to the survey (Table 1b). The number of surveys returned from each of the 3 mailings was 245, 59, and 91 respectively. Of the 395 surveys returned, all were considered usable responses for some aspect of the analysis. Of the 395 total returned surveys, 207 (52.4%) reported trapping activity during the 2020-2021 season (active trappers) and 188 (47.6%) reported no trapping activity (non-active trappers). Active trappers (N=207) reported trapping a total of 7,068 days (average 34.1 days per trapper), setting 12.1 traps per day, and harvesting 6,621 furbearers (Tables 3 and 5). When results were extrapolated statewide, an estimated 945 trappers harvested a total of $32,753 \pm 4,541$ furbearers (Table 11). By species, total statewide trapper harvest was estimated to be 7,925 raccoon, 6,886 muskrat, 4,165 opossum, 3,750 coyote, 3,730 red fox, 3,186 beaver, 984 otter, 757 skunk, 707 gray fox, 554 bobcat, 109 mink, 0 nutria, and 0 long-tailed weasels (Table 11). Average harvest per season for trappers targeting certain species was highest for muskrat, followed by raccoon, beaver, red fox, coyote, otter, opossum, striped skunk, gray fox, bobcat, mink, nutria, and long-tailed weasel (Table 12). Trapper responses by license type and reported numbers of trappers, effort, and harvest from response data are presented in Tables 1–8. Extrapolated statewide and regional trapping effort and harvest estimates for all furbearer species are presented in Tables 9–12. Rare furbearer observations are reported in Table 13.

TABLES & FIGURES

Table 1a. Summary of trapping licenses sold for the 2020-2021 season
(excluding lifetime licenses).

License Type	Total		Sample	
	N	%	N	%
County/City Resident Trapping	692	35.4	541	36.1
Non-Resident State Trapping	32	1.6	25	1.7
Resident 65 and older Trapping	131	6.7	99	6.6
Resident Junior State Trapping	88	4.5	72	4.8
Resident State Trapping	953	48.8	716	47.7
Resident State Trapping - 2 Years	36	1.8	29	1.9
Resident State Trapping - 3 Years	5	0.3	5	0.3
Resident State Trapping - 4 Years	17	0.9	13	0.9
Total	1,954		1,500	

Table 1b. Summary of trapping licenses sold in Virginia that were valid during the 2020-2021 season, license types represented in the survey sample, and license types represented by those who responded (active and non-active trappers) to the 2020-2021 Virginia Trapper Harvest Survey.

License Type	No. licensed trappers	% of licensed trappers	No. in survey sample	% in survey sample	No. of respondents	% Return for License Type ¹	No. active trappers	No. non-active trappers	% of respondents ²
Annual	1,864	95.4	1,428	95.2	362	25.4	190	172	47.5
Multi-year	58	3.0	47	3.1	20	42.6	11	9	45.0
Non-resident	32	1.6	25	1.7	9	36.0	4	5	55.6
Unknown	0	0	0	0	4	---	2	2	50.0
Total	1,954	100.0	1,500	76.8	395	26.3	207	188	47.6

¹ Derived by dividing the number of respondents by the total number in the survey sample for each license type

² Derived by dividing the number of active/non-active trappers by the total number of respondents for each license type

Table 2. Number of Virginia trappers by number of counties trapped and physiographic region.

No. of Counties Trapped	No. of Active Trappers	% of Trappers
One	167	80.7
Two	29	14.0
Three or more	7	3.4
No county reported	4	1.9
Total	207	100.0

Region Trapped	No. of Active Trappers ¹	% of Trappers ²
Northern Mountain	28	13.5
Southern Mountain	50	24.2
Northern Piedmont	33	15.9
Southern Piedmont	54	26.1
Tidewater	54	26.1
Not Given	4	1.9

¹ An individual trapper may trap in multiple regions; hence, the summation of these values will exceed the total number of trapper respondents

² Derived by dividing number of trappers in region by total number of trappers that reported county information (N=207)

Table 3. Targeted furbearer trapping efforts reported by respondents to the 2020 - 2021 Virginia Trapper Harvest Survey (N= 207).

Target species	No. trappers that targeted species	% of total active trappers	Total no. days trapped	Average no. days trapped	Average no. traps set per day per trapper	Total no. of trap days
Beaver	73	35.3	1,596	21.9	7.2	11,491

Table 13. Rare furbearer observations based upon responses to the 2020-2021 Trapper Harvest Survey.

Species	No. observed	No. trapped	List of counties observed ¹ or feature reported	List of counties where trapped
Fisher	3	0	Dinwiddie, Page, Indeterminable	None
Spotted Skunk	2	1	Bath, Wythe	Not given
Least Weasel	0	0	None	None

¹ county locations are provided where possible and are based on descriptions provided by respondents. Some reports did not specify county, or did not provide sufficient information to determine county.

Appendix A: Survey Instrument

2020-2021 Virginia Trapper Harvest Survey

This is your 2020-2021 Virginia Trapper Harvest Survey. Please complete the survey and return it in the enclosed business reply envelope. Your response is completely confidential and very important. Please send in your response, even if you did not trap this season. If you have any questions or concerns, please contact Furbearer Project Leader Mike Fies at (540) 248-9390 or mike.fies@dwr.virginia.gov.

First, did you trap in Virginia between November 15, 2020 and February 28, 2021?

Yes No

If NO: Please stop here and return the survey in the postage-paid envelope.

If YES: How many days did you trap during the season dates listed above? _____

On average, how many traps did you have set per day (or night)? _____

Please complete the remainder of the survey on the opposite side of this page using the instructions below.

Instructions for Completing the Trapping Table (see opposite side of this page):

1. Please only report information for furbearers trapped during the general trapping season (Nov. 15, 2020 to Feb. 28, 2021). Do not report information for animals trapped under authorization of a Commercial Nuisance Animal Permit or other nuisance animals trapped outside the general season. Also, please do not include live foxes trapped for transport to foxhound training preserves.
2. **For Primary and Secondary Target Species (animals you were targeting when you set the traps):**
 - The **primary target** species is the animal you were most interested in catching in a particular trap set. If you were targeting multiple species with the same trap set (i.e. a dirt hole set for coyotes and foxes), please choose one species as your primary target and list the others as **secondary targets**.
 - For each **primary target** species, please circle "P" in the first column and indicate total # of days trapped, average # of traps set per day, and total # of animals trapped in each county. See beaver example for how to report primary target species trapping.
 - For each **secondary target** species, please circle "S" in the first column and list the same information as for target species, including the total # of days trapped, average # of traps set per day, and total # of animals trapped in each county. See red fox/gray fox/raccoon example for reporting a trap line with primary and secondary targets.
 - If you were unsuccessful at catching a targeted species, place a "0" for the total # of animals trapped, but still report the total # of days trapped and the average # of traps set per day for that species. See bobcat example for how to report unsuccessful target species trapping.
3. **For Non-Target/Incidental Species (animals you were not intending to capture as either a primary or secondary target):**
 - If you captured non-target/incidental animals, please report the total # of animals trapped, but place a "0" for the total # of days trapped and a "0" for the average # of traps set per day, since these animals were not the target of your traps. See opossum and striped skunk examples for how to report incidentally trapped animals.
4. **For fisher, spotted skunk, and least weasel:**
 - Please indicate if you observed or trapped these species during the past trapping season. If YES, please provide a detailed location where each animal was observed or trapped OR you may contact DWR Furbearer Project Leader Mike Fies at 540-248-9390 or mike.fies@dwr.virginia.gov to provide specific details.

PLEASE READ THE INSTRUCTIONS ON THE OPPOSITE SIDE OF THIS PAGE BEFORE COMPLETING THIS SURVEY.

Write in the name of each county or city in which you trapped

	Example	County/City #1	County/City #2	County/City #3
	Buckingham			
For each species, record whether it was a primary, secondary, or non-target species, total # of animals trapped, total # days trapped, and average # traps set per day (please see instructions on opposite side of page) →				
Beaver	(P S N 15)	10	17	P S N
Bobcat	(P S N 7)	5	0	P S N
Coyote	P S N			P S N
Gray Fox	P (S) N 12	8	2	P S N
Red Fox	(P) S N 12	8	10	P S N
Mink	P S N			P S N
Muskrat	(P) S N 30	15	55	P S N
Nutria	P S N			P S N

Fisher	Spotted Skunk
Please indicate if you observed or trapped any of the following species during this past trapping season. If YES, please provide a detailed location where the observation occurred. You may also provide details to DWR Furbearer Project Leader Mike Fies at 540-248-9390 or mike.fies@dwr.virginia.gov	Did you observe a fisher during the past trapping season? <input type="checkbox"/> Yes <input type="checkbox"/> No Did you trap a fisher during the past trapping season? <input type="checkbox"/> Yes <input type="checkbox"/> No Detailed location: _____
	Did you observe a least weasel during the past trapping season? <input type="checkbox"/> Yes <input type="checkbox"/> No Did you trap a least weasel during the past trapping season? <input type="checkbox"/> Yes <input type="checkbox"/> No Detailed location: _____

Appendix B: Cover Letter (1st Mailing)

Matthew J. Strickler
Secretary of Natural Resources

COMMONWEALTH of VIRGINIA
Department of Wildlife Resources

Ryan J. Brown
Executive Director

August 12, 2021

Dear Trapper,

Enclosed you will find the 2020-2021 Virginia Trapper Harvest Survey from the Virginia Department of Wildlife Resources. We apologize that you have not received this survey before now. If you have provided trapping data during previous years, we greatly appreciate your past cooperation. Last year, 512 trappers responded and reported harvesting 9,901 animals during 8,333 days afield. Regardless of whether you have participated in the past, we hope that you will choose to fill out the survey this year. This voluntary survey provides the Department with important information to estimate the total statewide harvest of furbearers during the 2020-2021 trapping season.

This survey is being sent to a random sample of Virginia licensed trappers. It is important that every recipient send in a response. All information on this survey is **completely confidential**. No personally identifiable information from the survey will be stored in the database so that responses cannot be tied to an individual. A postage-paid envelope (addressed to our survey administrators at Virginia Tech) is enclosed for your convenience in returning the completed questionnaire.

If you prefer to fill out this survey online, we have provided this option to you. The online version can be accessed at <https://vatrappingsurvey.info>. There is no need to send in a paper copy of the survey if you choose to respond online.

If you have questions or comments about this survey, please feel free to contact Mike Fies, Furbearer Project Leader, via email at mike.fies@dwr.virginia.gov, phone at (540) 248-9390, or by mail at Virginia Department of Wildlife Resources, P.O. Box 996, Verona, VA 24482.

Your assistance in providing trapping harvest information is greatly appreciated and important for protecting trappers' interests and effectively managing Virginia's furbearers into the future. Please try to complete and return the questionnaire **within the next 10 days**, if at all possible. Thank you in advance for your cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael L. Fies".

Michael L. Fies
Furbearer Project Leader
Virginia Department of Wildlife Resources

Equal Opportunity Employment, Programs and Facilities

Appendix C: Postcard Reminder

2020-2021 Virginia Trapper Survey Reminder

We haven't heard from you yet! This is a friendly reminder to please fill out and return the 2020-2021 Virginia Trapper Survey that was recently mailed to you. If you have already completed this **confidential** survey and returned it, please accept our sincere thanks and disregard this reminder notice. If you haven't returned the survey yet, please do so at your earliest convenience. If you prefer to respond online, you can do so at the following link: <https://vatrappingsurvey.info>. Your response is important to us and will help generate meaningful estimates of statewide furbearer harvests to effectively manage populations for future trappers. If you did not receive a questionnaire, it was misplaced, or you have questions about the survey, please feel free to contact me at 540-248-9390 or mike.fies@dwr.virginia.gov.

Thank you,
Mike Fies
Furbearer Project Leader
Virginia Department of Wildlife Resources

Appendix D: 2020–2021

Virginia Trapping Season Dates

There is a continuous open season to trap beaver, muskrat, opossum, and raccoon within the incorporated limits of any city or town in the Commonwealth, and in the counties of Arlington, Chesterfield, Fairfax, Henrico, James City, Loudoun, Prince William, Spotsylvania, Stafford, Roanoke, and York.

Species	Start of Season	End of Season
Beaver	December 1 st	February 28 th
Bobcat	November 15 th	February 28 th
Coyote	Continuous open season	
Fisher	Continuous closed season	
Fox ¹	November 15 th	February 28 th
Mink	December 1 st	February 28 th
Muskrat	December 1 st	February 28 th
Nutria	Continuous open season	
Opossum	November 15 th	February 28 th
Otter	December 1 st	February 28 th
Raccoon	November 15 th	February 28 th
Striped Skunk	Continuous open season	
Spotted Skunk	Continuous closed season ²	
Weasel	December 1 st	February 28 th

¹ Fox trapping is prohibited in Clarke (except on G. Richard Thompson WMA), Fauquier (except on Chester F. Phelps WMA and G. Richard Thompson WMA), Loudoun, and Rappahannock counties.

² Spotted skunk and the pelts of spotted skunk may not be sold.
