

Disposal Options for Deer Carcasses from Disease Management Area 1

Movement of deer carcasses infected with chronic wasting disease (CWD) across the landscape by hunters is suspected to play a role in the spread of CWD across North America. Hunters are encouraged to discard leftover deer parts into landfills to minimize contamination of the environment with the infectious agent that causes CWD.

Leftover parts of deer harvested anywhere in Disease Management Area 1* (DMA1) should be:

- ✓ **Double-bagged and placed directly in a landfill, a trash receptacle to be picked up with the regular trash collection, or in an approved deer-carcass disposal site (see list below)**
 - ✓ Landfill disposal is the best way to prevent the spread of CWD
 - ✓ Deer waste should be double-bagged in black garbage bags with no deer parts sticking out and bags should not be leaking

* Leftover deer parts from deer harvested in DMA1 may not be legally transported outside of DMA1

Approved Deer Carcass Disposal Locations Located in Disease Management Area 1

FREDERICK COUNTY
